These limitations apply without regard to the cause or responsibility of any liability or damage.

If "Green" Option is selected, please note the following:

Your Rate includes the voluntary purchase of renewable energy certificates (RECs) generated in Illinois to offset 100% of your usage as reported by the Utility. For every unit of renewable electricity generated, an equivalent amount of RECs is produced. Your purchase of RECs is supporting electricity production in the respective Illinois and helps offset conventional electricity generation in the region where the renewable electricity generator is located. The purchase also helps build a market for renewable electricity and may have other local and global environmental benefits such as reducing global climate change and regional air pollution. Green-e Energy certifies that the Municipal Aggregation with Green Option Plan meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information about RECs, please visit www.green-e.org.
